### REC\_DS using C\_Week 1\_COD\_Question 6

Attempt : 1  
Total Mark : 10  
Marks Obtained : 10

#### Section 1 : Coding

##### 1. Problem Statement

John is tasked with creating a program to manage student roll numbers using a singly linked list.

Write a program for John that accepts students' roll numbers, inserts them at the end of the linked list, and displays the numbers.

##### ***Input Format***

The first line of input consists of an integer N, representing the number of students.

The second line consists of N space-separated integers, representing the roll numbers of students.

##### ***Output Format***

The output prints the space-separated integers singly linked list, after inserting the roll numbers of students at the end.

Refer to the sample output for formatting specifications.

### **Sample Test Case**

Input: 5

23 85 47 62 31

Output: 23 85 47 62 31

### **Answer**

```
// You are using GCC
struct Node* insertAtEnd(struct Node*
head,int rollNumber){    struct Node* nn=(struct
Node*)malloc(sizeof(struct Node));
nn->rollNumber=rollNumber;
    nn->next=NULL;
if(head==NULL){
    head=nn;    return nn;
}
struct Node* temp=head;
while(temp->next!=NULL){

    temp=temp->next;
}
temp->next=nn;
return head;
}

void display(struct Node* head){
struct Node* temp=head;
while(temp!=NULL){
    printf("%d ",temp->rollNumber);
temp=temp->next;
}
}
```

**Status :** Correct

**Marks :** 10/10
