Marks Obtained : 10

Section 1 : Coding

1. Problem Statement

Bob is tasked with developing a company's employee record management system. The system needs to maintain a list of employee records using a doubly linked list. Each employee is represented by a unique integer ID. Help Bob to complete a program that adds employee records at the front, traverses the list, and prints the same for each addition of employees to the list.

Input Format

The first line of input consists of an integer N, representing the number of employees.

The second line consists of N space-separated integers, representing the employee IDs.

Output Format

For each employee ID, the program prints "Node Inserted" followed by the current state of the doubly linked list in the next line, with the data values of each node separated by spaces.

Refer to the sample output for formatting specifications.

Sample Test Case

Input: 4

101 102 103 104

Output: Node Inserted

101 Node

Inserted

Node Inserted

103 102 101

Node Inserted

104 103 102 101

Answer

```
#include
<iostream>using
namespace std;
struct node {
    int info;
    struct node* prev, * next;
};
```

```
struct node* start = NULL;
```

```
// You are using GCC
```

```
struct node* head=NULL;
```

```
void traverse() {
```

```
    //type your code here.
```

```
    printf("Node Inserted\n");
```

```
    struct node* temp=head;
```

```
    while(temp){
```

```
        printf("%d ",temp->info);
```

```
        temp = temp->next;
```

```
}  
printf("\n");  
}
```

```
void insertAtFront(int data) {  
    //type your code here struct node* newNode=(struct  
    node*)malloc(sizeof(struct node)); newNode->info=data;  
    newNode->prev=NULL; newNode->next=NULL; if(head==NULL){  
    head=newNode; return;
```

```
}  
if(head!=NULL){  
    (head)->prev=newNode;  
    newNode->next=head;  
    head=newNode;  
}  
return;  
}
```

```
int main() { int n, data;  
cin >> n; for (int i = 0; i <  
n; ++i) { cin >> data;  
insertAtFront(data);
```

```
traverse();  
}  
return 0;  
}
```

Status : Correct
